## An European Alliance for Green Youth Entrepreneurship

On 12 June 2025, the partners of the SAGE project met in Międzybrodzie Bialskie, Poland, officially launching their collaboration under Erasmus+.

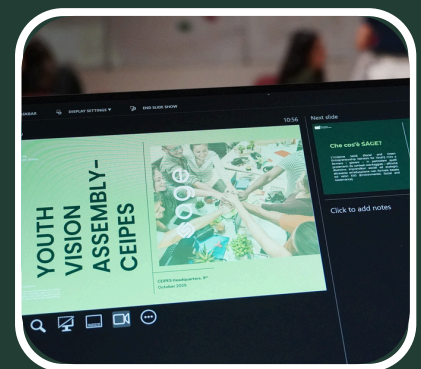

The Kick-Off Meeting marked the start of a joint European effort to empower young people through social and green entrepreneurship, laying the foundations for an innovative learning pathway aligned with quality standards and sustainability goals.

## Young Voices Shape the Future of Green Entrepreneurship

Over the past months, SAGE partners have engaged young people across participating countries through local Youth Vision Assemblies, ensuring that the project's Learning Pathway is grounded in real experiences and needs. Participants reflected on the challenges they face in accessing entrepreneurship opportunities, highlighting gaps in financial literacy, mentoring and transparent information channels. Following these Assemblies, the project partners worked on developing training modules focused on the three pillars of ESG sustainability. These modules will be part of a Non-Formal Learning Pathway designed to promote social and green entrepreneurship among young people.

## Online International Workshop for Validation

These contributions were reinforced during the international online workshop held in January 2026, where experts and stakeholders from across the partnership reviewed and validated the draft training modules. Their feedback is now guiding the final refinement of practical and inclusive materials designed to prepare young people for the evolving green job market.
